Number of residents	55	46	43

Research resident training

The research residency system was started in April 2001 to train young researchers in the field of basic and applied cancer researches at our research institute.

	2017 fiscal year	2018 fiscal year	2019 fiscal year
Number of research residents	8	6	9

Training of technical personnel for medical treatments

The shortage of specialized technical personnel for the treatment of cancer is an obstacle in the promotion of cancer control programs. To solve this problem, since 1966, full scale training has been provided.

The accomplishment of this Center in this area has gained an international reputation and applicants for this training course now come from various countries as well as from all over Japan.

	1966-2019 fiscal years	2017 fiscal year	2018 fiscal year	2019 fiscal year
